

DOWNTOWN RECREATION CENTER OVERFLOW PARKING

As you may have noticed there is currently construction around the Downtown Recreation Complex. This construction activity may impact some of the nearby parking areas. At the same time, holiday events and programs may bring an increased number of visitors to the Recreation Complex. We want to make sure you are aware of available parking options.

The main Recreation Complex parking area is shown on the map in green. Should this parking area be full when you arrive, please know that overflow parking is available a short walk away at the corner of Parramore Avenue and Amelia Street, shown in yellow.

Follow the blue path along Parramore Avenue to the Recreation Complex.

If you're attending events at the Recreation Complex, please consider carpooling with your friends or family or using LYNX and LYMMO which have stops nearby.

As construction activity continues, we assure you efforts are underway to find the best parking options available for you.
